

Lactophar[®]

Synbiotics: Live colonic bacteria (lactobacilli) with dietary fibre in a chewable or swallowable tablet.

USE: 1 tablet/day

PACKAGING: Available per 10, 30 and 90 blistered tablets/box

PRODUCT DESCRIPTION

Lactophar is a balanced combination of benign, stomach acid resistant, antibiotic and clavulanic acid resistant bacteria in combination with the required dietary fibre that can be quickly metabolised by the bacteria.

- ✓ **10 billion** benign human bacteria per tablet;
- ✓ Also contains **dietary fibre in the form of inulin and FOS (fructooligosaccharides)** that are a natural food for human colonic bacteria;
- ✓ **Unique stability** at room temperature;
- ✓ User friendly **chewable or swallowable tablet or as a compressed lozenge**;
- ✓ Guaranteed **lactose-free**;
- ✓ May also be taken **together with antibiotics**.

FORMULA (per daily dose of 1 tablet)
